The Ambu SPUR II with Manometer & Expiratory Filter combines the quality and performance of an Ambu BVM with new features to protect the first responder and help provide quality respirations to the patient.

- Expiratory filter protects the first responder from the unknown by removing 99% of the exhaled airborne particulates
- Disposable Manometer allows for accurate measurement of delivered oxygen (0-60 cm of pressure)
- Sensitive patient valve (less than .5 cm to actuate the valve) for spontaneous breathing
- Made from SEBS (styrene-ethylene/butylene-styrene) instead of PVC
- Small and easy to hold with SafeGrip™ surface
- Convenient handle allows for one-handed ventilation

The manometer is used for monitoring the patients airway pressure during ventilation.
